PROFESSIONAL SUMMARY

- With six years of comprehensive experience in software development work across diverse industries, such as Insurance and IT Service providers.
- Expertise that extend to both front and back end workflows, encompassing the entire project from inception to deployment and ongoing maintenance.
- Proven capabilities and technical proficiency by leading a 5-member software development team in building functional web and mobile-based application.
- Proficient in a wide array of technologies, including HTML, CSS, Javascript, ReactJS, Redux, and React Native, having hands-on experience in crafting intuitive and responsive user interfaces.
- Advanced skills in NodeJS, RestAPI, Postgres, MySQL, and MongoDB, coupled with a deep understanding of API integration, CI/CD, and Microservices architecture.
- In-depth experience designing web application structures, implementing coding standards, managing test scripts, conducting root cause analysis, and driving continuous integration and development practices within an Agile/Scrum environment.

PROFESSIONAL EXPERIENCE

PRULIFEUK PH – Full Stack Developer

March 2021 to September 2023

- Completed development tasks related to the back-office processes of the company.
 - Collaborate with developers to enhance application usability and user interface.
 - Deliver high-quality source code on time.
 - Identify and rectify errors for optimal performance.
- Developed tools for Technical Support automation.
 - Streamline operations for the technical support team by automating daily backlog management, data extraction from databases, and report generation.
- Performed Analysis and Improvement that significantly reduced the backlogs
 - Conduct comprehensive root cause analyses to pinpoint errors and bugs, facilitating continuous enhancement and refinement of developed applications.
 - Ensure thorough analysis and visualization of project products to optimize functionality and user experience.

- Documentation and Collaboration
 - Draft functional requirement documents and comprehensive coding guides to streamline development processes and ensure code quality.
 - Exhibit experience in Agile methodologies, fostering an environment of adaptability and continuous improvement.
 - Demonstrate proficiency in deciphering the stakeholders' application needs and specifications, transforming them into fully functional features.
- Technologies Used:
 - ReactJS, Node.JS, HTML, CSS, JavaScript, MySQL, MongoDB, PostgreSQL, Firebase, Azure, Rest APIs, Amazon Web Services.

IT MATTERS – Web Developer

January 2018 to March 2021

- Developed several projects from inception to maintenance
 - Built web-based applications utilizing technologies such as ReactJS, Node.js, WordPress, and Laravel, ensuring functionality and user satisfaction.
 - Create responsive websites using WordPress, implementing necessary hooks on plugins for additional functionality
- Demonstrated proficiency in database structuring and management
 - Utilize MySQL, MongoDB, PostgreSQL, and Firebase.
- Conducted website Maintenance and Debugging:
 - Conducted website maintenance, error identification, and debugging to ensure optimal performance.
- Technologies Used:
 - Technology Used: ReactJS, Node.JS, HTML, CSS, JavaScript, MySQL, MongoDB, PostgreSQL, Firebase, Azure, Rest APIs, Amazon Web Services

EDUCATION

BS ACCOUNTANCY – Asian Development Foundation College

January 2015 to March 2020

- Dean's Lister for 4 consecutive years.

SKILLS

- MVC Design and Patterns, Agile/Scrum Methodology
- ReactJS, React Native, Express, HTML, CSS, Redux
- Node.js, WordPress, Laravel, PHP, Docker
- MongoDB, MySQL, PostgreSQL, Firebase, Sequelize
- Azure, AWS Lambda, EC2, S3 bucket, Apache
- API Integration, Restless and Serverless API
- Ubuntu Server, CI/CD Setup
- Github, Git
